DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishii et al.

The patent by Ishii et al. (4,907,546) shows an engine driven work machine with an engine (4), a work machine (5) driven by the engine, and electrical components (84) belonging to the work machine. An open machine accommodating section is provided in a main body of the work machine and accommodates an engine and a work machine driven by the engine, and a fan (6) capturing cooling air via a ventilation path. A control box (2) for accommodating part of the engine, electrical components of the work machine, and a fuel tank is provided above the machine accommodating section, and has a ventilation path that connects to a fan (72) fitted to the engine. The electrical components and the fuel tank are arranged along the ventilation path.

The ventilation path is connected to an engine cooling air passage of the work machine and a muffler cooling air passage.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/800,658

Art Unit: 3747

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishii et al. in view of Fukuda et al.

The patent by Ishii et al. does not show that the electrical components are provided in any order along the ventilation path. The patent by Fukuda et al. (6,775,981) shows the arrangement of electrical components in the ventilation path is such that the high heat generating electronics are further downstream (Col. 8, lines 38-53). The cross sectional area of the ventilation path decreases as its distance from the inlet increases.

Response to Arguments

Applicant's arguments filed 6/22/05 have been fully considered but they are not persuasive. It is the view of the examiner that the patent by Ishii et al. discloses a work machine with ambient air entering the case, it is therefore "open" as required by the limitations of the application.

It is further the view of the examiner that the ambient air flow path described in the Ishii et al. patent can be considered a "ventilation path" as required by the limitations of the application.

The operation panel of Ishii et al. is electrical and therefore meets the limitation of an "electrical component". **Conclusion**

Application/Control Number: 10/800,658

Art Unit: 3747

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Benton whose telephone number is (571) 272-4838. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Yuen can be reached on (571) 272-4856. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
